Phone your requirements—we deliver when you  
want it—where you want it.

Try "Autolene" Lubricating Oil, my grade to  
suit your tractor. There is none better.

**B. M. ROBERTS, - Agent.**

## Steeves-Ruggles

The Guess Ranch was the scene of a very pretty wedding on Tuesday, Sept. 14th, when Jessie Loreen, twin daughter of Mr. and Mrs. J. A. Ruggles became the bride and J. G. Steeves, son of Mr. and Mrs. R. Steeves, of Yetwood, The Rev. S. R. Hunt, B.A., B.D., of Champion officiated. The ceremony took place on the verandah where an arch neatly decorated in pink and white had been erected. The bride who was given in marriage by her father, looked very lovely in her bridal gown of white satin, fashioned on long straight lines, with the skirt featuring the new drapery effect and was caught at each side with orange blossoms. She carried a bouquet of butterfly roses. Miss Leone Ruggles, twin sister of the bride was bridesmaid and was frocked in peach georgette, fashioned with the close fitting bodice, and a shoulder bouquet of shaded flowers. Mr. Ralph Steeves, brother of the bridegroom was the best man. At the close of the ceremony a reception was held for the immediate friends and relatives of the contracting parties. The happy couple left the same evening for Calgary where a short honeymoon will be spent. They will reside on the groom's farm at Yetwood. The newlyweds were very popular in the district and the array of useful and costly presents was direct evidence of this. The community at large will join in wishing Mr. and Steeves-bon voyage.

### Grain Congestion Increases

Winnipeg, Sept. 25.—Serious congestion in the lake head's mammoth grain elevators brought suggestions yesterday that the placing of an embargo on western grain shipments appeared to be the only remedy to the situation. Fort William and Port Arthur terminal elevators, with a storage capacity of 80,000,000 bushels, are housing practically 70,000,000 bushels, leaving comparatively small storage space through which to move the incoming crop. Lack of demand for Canadian grain in world markets and the resulting congestion at Montreal, is responsible for the situation at the head of the lakes, and last night railway authorities here intimated that the placing of an embargo probably will be necessary within the next 48 hours.

As the regular time has passed for the incubation of any cases of smallpox from exposure to the cases developed here, without any new cases developing, the school is again open and other restrictions will be removed in the near future. The source of the infection which resulted in the illness in the Bastia family is a mystery. It is understood all the patients are well on the way to complete recovery.

The Ladies' Aid will meet at Mrs. Woodhall's, Oct. 3rd. Mrs. W. E. Williamson and Mrs. J. T. Stephenson will assist in serving.

The W. I. Halloween dance will be held on Monday evening Oct. 28th in the community hall.

While there has been no appreciable rainfall it has been threatened for some days. What slight precipitation there was had the effect of improving the roads.

Now for the short days and long nights.

## Local and General

Members of the O.E.S. are reminded that the regular meeting is postponed.

Horace Steeves is now in the University at Edmonton, completing his course as a druggist.

Miss Forbes McGillivray of Calgary is making good progress after an operation for appendicitis.

Mr. and Mrs. H. Anderson motored to Calgary on Tuesday on receipt of the news that the latter's mother was ill.

Joe Bennett, of Enchant, passed through Champion en route to Calgary on Sunday, returning home on Monday evening.

Mrs. R. Steeves of Medicine Hat was in town on Monday on her way to the Guess Ranch to attend the wedding of her son, Jack.

It is rumored that H. C. Crane has again purchased land in this vicinity and will return to the district in the near future.

Threshing is over with a very few exceptions. Geo. Rhodes has a few days more work left and Homer Howerton also has some acreage left.

Mr. and Mrs. W. Ulrich and Arthur motored to Calgary on Saturday, accompanied by J. O. Reid. The journey was continued to Airdrie where Mr. and Mrs. Reid reside.

Rev. S. R. Hunt preached at Granum on Sunday. Rev. A. H. Lowe, the pastor, is ill in the East and his pulpit is being supplied pending his recovery by different ministers in the Presbytery.

Mr. and Mrs. Orville Harper left this week for Banff and other points in the mountains. On their return they will be accompanied by Miss Ina Hamilton who has been at Lake Louise for the summer.

Mrs. Harry Smith is conducting a "Hope Chest" campaign for the Women's Institute which promises to be a highly successful affair. Tickets are now being offered which will undoubtedly meet with a favorable reception.

Oscar Sletto reports one of the best yields of wheat for this year. On eighty acres sown with pedigreed wheat the yield was 39 1/2 bushels per acre, and on 118 acres sown with ordinary seed 31 bushels per acre was realized—all No. 1 northern.

At the conclusion of the season's threshing on Friday night Jack Doyle entertained his crew royally, much to the satisfaction of the members of the crew who spent a good part of the night enjoying themselves. Jack had a very successful run extending over sixteen days this season.

Little Jimmie Wannop was the victim of an unfortunate accident on Saturday, nearly losing a foot when he ran in front of a mower with which his father was cutting hay. He was rushed to the Holy Cross hospital, Calgary, after first aid had been rendered where it is hoped the foot may be saved, although it was almost completely severed.

A wild harvester drove his opponent's head through Frank Clapp's window on Tuesday night. With Const. Bull's assistance he appeared before the J. P. on Wednesday and was fined \$20.00 and costs. In addition the window and a doctor's bill brought the total expense up to \$35.00. Fighting is really too expensive to indulge in freely.

## Piano Classes

Simple, fascinating method for beginners in Piano at only 25c a lesson. For particulars telephone Miss Wilson at Mrs. Chas. McLean's residence, Phone 26.

## RUBY GRAHAM

Teacher of Piano and Theory  
Studio  
Residence of Mrs. G. M. Campbell, Phone 76.  
All pupils successful in June examinations.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50 cents for first insertion 25 cents for each subsequent insertion. Commercial rates on application.

THURSDAY, Sept. 20, 1929

**NOTES AND COMMENT.**

After paying as high as \$2.00 apiece for muskrat skins in Alaska, a dealer landed in Montreal with 75,000 skin, only to find he could not realize over 75 cents for them. Local buyers are doing better than that.

Harvest and threshing has been completed in record time this year with the least outside labor that has been employed for many years past. Combines are a big feature, the season being particularly favorable for their use, while much short grain was more successfully handled in this way than would have been possible by any other method.

Oyen, Alta., is the latest point to provide a sensation in the search for oil, a tremendous gas flow having been struck at a depth of 315 feet. True, there may be more gas than oil, but even gas counts in the game.

Aaron Sapiro is preaching compulsory pooling of wheat in Saskatchewan. While there may always be a faction supporting this idea it is likely to be a long time before it is adopted. A compulsory pool might easily undo all that has been accomplished by the optional pool.

Another Canadian boat has been shelled by a United States patrol boat off New York harbor, in neutral waters. This will afford opportunity for another investigation after the "Im Alone" case is settled.

The town of Bloomfield, Neb., with 1431 inhabitants, has gone on a cash basis for the past year with very gratifying results. There is room here for an attempt to copy this move to a very great extent, at least.

Preparations for winter will now be in vogue, especially the harvesting of vegetables and other garden produce. The weather often gives a hint of what may be expected at any time—a frost sufficient to damage anything left outside that frost could damage.

The exodus to the south which occurs every fall is already under way. If any further evidence was needed to establish the fact of prosperity among the farmers of this district the number of those who spend the winter in California, etc., would furnish it.

Nearly all the threshing outfits pulled in on Friday and Saturday. While the run was short this year it was entirely satisfactory to the operators of machines, all the grain being of good quality, with light straw.

The finishing touches being put on the community hall again draws attention to this splendid utility achieved by community effort headed and influenced by the Champion Elk Lodge. There need be no fine distinction in this respect, however, as the Elks had reached a membership at the time this project was started that included such a large proportion of the community that there was not very much left to assemble to the support of the building. In the end the site, the plans used and

the general result have proven highly satisfactory to everyone concerned. The possession of this building has permitted entertainments impossible under old conditions and the general result in this direction has been to increase attendance to a very appreciable extent at every form of amusement or programme offered, and the better class of these entertainments has been highly appreciated. It is to be hoped community effort will continue to function in further improvements in other directions.

**Canada's Trade Growing Rapidly**

(Natural Resources.)

Nowhere is the advance in the development of Canada's resources more vividly reflected than in the records of the Dominion's export trade. The sheer increase in the value of that trade is amazing enough in itself, but no less astonishing is the manner in which Canada's exports have spread out into new channels.

The United Kingdom and the United States have long been Canada's two great customers, and until recent years other countries have taken only a minor share of the Dominion's exports. Within the past fifteen years a remarkable change has occurred. During that period the Dominion's sales to the United Kingdom have doubled in value, those to the United States have trebled, and at the same time exports to "Other Countries" have risen more than seven-fold. These "Other Countries," formerly a minor factor, now afford a huge market outlet for Canadian products. They bought from the Dominion last year a bill of goods greater in value than the whole export trade of Canada fifteen years ago.

To these widely scattered and lesser known markets Canada's resources furnish an immense variety of products in natural and manufactured forms. Silver and artificial silk to India, newsprint and sardines to Australia, potatoes to Cuba, lead and

**Lutheran Church Services**

The Lutheran church still preaches the Gospel of Christ and Him crucified. Lutheran services will be held, the Lord willing, at the Lutheran parsonage on Sunday, Sept. 22nd, at 11:00 a.m. Sunday School after services.

You are heartily invited to attend and to bring your friends.  
REV. F. A. DUENSING, Pastor.

Phone 60  
Champion, Alberta

**Combating A Scourge**

Eastern Ontario is fighting that scourge of youth, Acute Poliomyelitis (Infantile Paralysis) and both Ottawa and Toronto have had a large number of cases, the majority of the patients being children. Quite a few deaths have occurred. This is the season for infantile paralysis. There have been a few cases in Alberta within the last month. Now that the children have returned to school, there is daily contact, especially in this so in country schools, where during the vacation period children are usually widely separated.

If a child exhibits signs of sickness, i.e., fever, running nose, loss of appetite, irritability when touched, he should be isolated for twenty-four hours. In that time whatever disease is incubating will develop. On no account should other children be allowed in contact. The symptoms may develop nothing worse than a bad cold, or it may be measles or scarlet fever, or again it might be infantile paralysis. If at the end of twenty-four hours the child is still sick, a doctor is indicated. Where the whole future of the child may be concerned, it is criminal to run the smallest risk.

Pamphlets on Infantile Paralysis may be had free from The Canadian Red Cross Society, 407 Civic Block, Edmonton.

## Stiff Penalties Imposed By P.M.

Before P. M. Rogers at Lomond on Monday, H. W. Messenger of Queenstown, Alden Smith Sr. and Alden Smith Jr. of Shouldice, were fined \$20.00 and costs amounting to \$5.25 each and their guns confiscated. The charges were reported to have been shooting without a license and carrying loaded guns in a car. The sentence seemed unusually severe as the guns confiscated were valued at fully \$200.00. Two at least of the accused were farmers and needed no license, so that both the policemen and police magistrate accepted a plea of guilty when they must have known the charge was incorrect, if shooting without a license was charged against all three. The penalties scarcely seem to accord with the offence in any of the cases. None of accused had shot a single bird, four ducks in their car having been given them by other members of the party. Below we quote the clause in the game act with reference to resident's licenses. It is so clear no misconception could be put upon it:

20. No person, a resident of the Province, shall hunt, trap, take, shoot at, wound or kill any game bird without having in his possession a license duly issued to him so to do, which shall be known as a resident's bird game license:

Provided, however, that the provisions of this section shall not apply to any farmer or member of his family residing with him upon his farm, nor to those residents of the Province residing to the north of the fifty-fifth parallel of north latitude.

It will be a pity if this case is not appealed. If it established nothing else it would show conclusively that the same offense is usually punished much more leniently all over the province, and this variation from heavy to light penalties makes the whole situation ridiculous to the public. The fact that a plea of guilty was made in this case only emphasizes the severity of the penalties.

The answer to the question, "Peace or war?" rests to a great extent on whether certain ideas will forge triumphantly ahead or retreat, on whether public opinion inclines decidedly in the direction of peace. Without a disposition toward peace there can be no peace, or at best only a forced peace. In general, the popular movement to-day is toward peace and understanding. But, although peace is unquestionably possible it is not yet secure, and the dangers which threaten it proceed less from an actual, positive will to war (which hardly exists now in serious form) than from various misunderstandings that destroy good will.—The Crest.

During the year 1927 and 1928 the field crops branch conducted numerous experiments throughout the province with various chemicals that are now on the market for the eradication of perennial weeds, such as sow thistle, Canada thistle and quack grass. Several of these chemicals are promising in that they appear to be destroying these weeds even to the root system. Before the department can feel justified in making a statement as to the permanent effects of any particular chemical, it will require at least one year more of observation.—Department of Agriculture.

### Wanted

A part time representative wanted for Champion and district. Attractive contract. Right man and sales assistance given to close business. For particulars write Alvey Tourigny, Inspector Commercial Life Assurance Co., 618-15th Ave. W., Calgary.

### CLEAN LOOKING AND EASY TO KEEP CLEAN

COMFORT, cleanliness and appearance are the three main essentials of a good bed-spring, and when these three are joined together with the long life of Slumber King you have a spring of unusual merit. No sharp edges to tear bed clothes. A guarantee tag signed by Simmons Limited.

## This Man is NOT Smiling.

He has just been presented with several drafts which he has no money to pay and he has been going through his books to see what is the matter. Naturally, his language is unprintable.

This season has been above the average in farm profits; harvest is almost completed and much of the produce sold at unusually good prices.

**Isn't the time opportune to square up with the business man and give him a chance to meet his obligations?**

There are 695 names on the books in the Chronicle office. Nearly 600 of these are debtor accounts. If these are not paid to us our creditors are likely to be collecting them shortly. Please do not make us ask again. It's not a pleasure.

### Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statement of the world realized that unless something was done to remove those suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it came operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions killed, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to extend territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Brien's proposal for a League of Nations of Europe is economic rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and good will, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

### Accelerated Schedules Feature C.P.R. Fall, Winter Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time tables of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among

### FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the change of life. It helps me and I cannot say too highly. I was troubled with heat flashes and my menses were heavy so I could hardly walk to the farm work. I saw in the newspapers word about the Vegetable Compound and thought I would give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to see my letter if you choose."—MRS. D. E. PEARSON, Ontario.  
Ask Your Neighbor

which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

### Sheep Ranching Expanding Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 16,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

Visitors to the home of Charles Darwin in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

The chrysanthemum was introduced into England from China about 1790.

W. N. U. 3004

### A Real Necessity

"Don't Get Excited" Club Would Be a Boon To World

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is a don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and not excited enough over the big ones. Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more to be accomplished through poise and placidity than through effervescence and senile phenomena.

If a don't-get-excited club could be so organized as to conserve all the human voltage that now goes to waste through needless emotion it would mean that mankind had reached the suburbs of a new era.

### RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting the joints of the body on fire. The joints. Wet or cold weather may increase the pain, but the cause is not the cause. The cause is in the blood. Hot applications or rubbing the joints may ease the pain, but do not reach the cause and the pain is sure to return. The cause is in the blood. This is the most painful trouble you must treat it through the blood and this purpose can be accomplished by Dr. Williams' Pink Pills, which from its uses to lead actually make new, rich blood, thus driving the rheumatism from the system. Dr. Henry E. Amis, Lower East Pueblo, N.M., tells what these pills did for him. He says—"I had an attack of acute rheumatism so bad that I could not get out of my yards without so much suffering that I would feel faint. I could not get out of my bed, and my movements caused great pain. I was under the care of a doctor but did not prove much. Then, reading of a similar case in a newspaper, I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt that they were helping me. I took altogether about a dozen boxes, and my rheumatism was completely recomposed. Dr. Williams' Pink Pills." These pills can be got from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockton, Mass.

### Greatest Wheat Exports

Canada Stands At Top Of The List As Exporter Of Wheat

Canada stood first as an exporter of wheat during the 1927-28 season, with exports of 255,062,275 bushels. The United States came second with exports of 168,307,000; Argentina, third, with 105,265,000; and Australia fourth, with 80,860,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 476,605,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes to do help. Dr. J. D. Kellogg's Asthma Remedy will give you the aid you need so surely. Choking crises, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and are no longer sufferers. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Women in children. If they be not attended to, cause convulsions, and often death. Mother Grange's Worm Expeller will protect the children from these distressing afflictions.

People in the United States use up more than a million lead pencils each year.

### Tired Feet

Bathe with Minard's warm water, rubbing into aching parts. Soothing and relieving.

Hindu surgeons in early times used more than 100 different surgical instruments and performed difficult operations.

### Mystery Of Steel Hardening

Steel Now Produced That Is Harder And More Ductile Than Damascus

Mystery and secrecy that for centuries shed romance over the art of steel hardening in America, has almost entirely disappeared, according to W. H. Eisman, secretary of the American Society for Steel Treating.

The famous blades of Damascus, tempered, says legend, by being run through the body of a slave, hold no secrets for modern swordsmiths. Steel is produced now that is harder than Damascus and possibly more ductile.

Dr. W. S. Carnes, a metallurgist of Canton, Ohio, has produced a steel which he has named, and yet so ductile that he can wind it several times around his arm. It is of carbon vanadium steel. As recently as 10 years ago, some of the processes of hardening steel were carried on in gloomy and secluded abodes, where the workers, even wearing a high silk hat, muffled themselves and made passes over the treating tank.

Potatoes played an important role. Half a spud was set adrift on the water. Where the potato came to rest was the best place to plunge the white-hot steel. During the war, a great stir was made when a group of steel treaters in Poughkeepsie, N.Y., could not obtain water from Sheffield, England. They thought this world over had tried to imitate.

Today the process of steel hardening has become automatic with colored lights flashing the instant steel assumes the proper hardness.

A Carrier Of Pulmonary Trouble—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from this ailment with the certain belief that they will find relief. It will allay inflammation in the bronchial tubes.

Had Been There "Travelers" said earlier in a train to a passenger who had questioned him. "I should think I have. I've been all round the world; over an under it, too. There isn't many ports I don't know the inside of."

"Why, you must know a lot about geography."

Increase In Water Power The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 20,000 h.p. added to the Dominion's total within the half year.

Many have been relieved of corns by Hare's Corn Remover. It has the power of its own that will be found effective.

Will Establish Sanatorium The government of Manitoba has decided to devote the \$250,000 voted at the last legislature, to establishing a sanatorium for tubercular children in Winnipeg.

Stop Colds with Minard's Liniment. Applies imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

A penalty for failing to vote in elections is exacted in Czechoslovakia.

### During Stunt Flies

"Four Musketeers Of The Air" Dey Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a Canadian aviator who is rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McPherson, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Stinson pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunts at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed. One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at about 2,000 feet altitude, come down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

### Postal Revenue

Now On A Level With What It Was Three Years Ago When Letter Rate Was 5 Cents

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31, 1928, the revenue was \$31,025,000, and for the fiscal year ended March 31, \$31,170,000.

A census is to be taken in more than 200 countries and colonies next year.

Rubber can be obtained from more than 300 varieties of tropical trees.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bonito, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was being followed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is mugged. When she sees Al later in the nursery being devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

### CHAPTER XIV.

Al heard Molly's step and turned to embrace her. But she avoided his grasp, stifling the look of aversion in her eyes as he did so. Al thought nothing of it. He believed she was merely anxious to avoid his noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand.

"Sh," she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a touch or two with little Junior. So, after Molly turned away to go to her own room, Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily, and as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face. In spite of herself, then, stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Come here."

Seriously Al carried his precious bundle toward Molly, who waited, a look of indignation upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my cousin."

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap,

face desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with pleading eyes, sent a dreadful current of fear through him. Was there nothing he could say to arouse her to drive out this evil spirit and bring back the baby she loved. He said with a controlled quietness that gave no hint of his madly throbbing heart.

"You act as though you didn't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minutes they were out of a look of disdain curled her lips and her eyes flashed defiance.

"Now—let me go!" she cried, her face clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down infernal corridors in his brain, and came echoing back.

But finally Molly could stand the silence no longer.

"You hear me?" she exclaimed harshly. "I mean it. I don't love you! Do you understand? I don't love you! Now let me go!"

The last remark was spoken at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now. She thought of nothing but how to pretend on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power.

Al did not cringe as he listened to her, yet he knew at that instant that the two words coming together were utterly smashed. His face was pale as death. But as they faced each other, eyes aglaze, heads clinched, they heard another sound like the faintest tinkle of a bell. It was Junior's voice, calling gently.

"Mamma! Please come to me."

(To Be Continued.)

## WHEN BABY IS WELL.

### MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, chirping baby who always brings joy to the home. When baby is ill everyone in the home suffers. The mother only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy and content because they have found the way to keep their little ones well and healthy.

At this moment she glanced in the mirror to see Al approaching from behind, his face aglow with that same expression of joy and devotion.

As he came closer and slipped his arms around her she jumped up and stepped out of the embrace, making no attempt to hide her displeasure.

Before Al could say anything in protest she had crossed the room. He shook his head in astonishment. Oh, well, he thought philosophically, it was just another of Molly's moods.

He made a move toward her, but suddenly Molly's white arms went above her head in protest. She stood glaring at him, like an animal at bay.

"What's the matter with you, Molly?" he asked sharply in amazement. "What have I done? For weeks you haven't seemed like your self."

There was change in Al's voice, and there was pleading, too. The expression of aversion left Molly's

face. He took his head in both hands and looked at the ceiling. Just like Chicago and New York and London, this metropolis has its maddest drivers and its drunken drivers.

And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road to rapidly. Two passengers were killed and the others injured. Icelandic authorities halted the driver into court, found him guilty and sentenced him to a month in jail. His license was taken away permanently.

But that corn with Minnie's Limit.

"Ain't you going to get up and fight? I told you you've got him good."

"That's all right, you tell me when he's gone."

## "Electric Man" Puzzles Doctors

Receives Shock When Using Telephone Or Radio Headphones

Frederick Stone, a chauffeur at Holworthy, north Devonshire, England, is so charged with electricity that

(1) He cannot use a telephone or wear a radio telephone without receiving a shock, and

(2) He cannot drive his automobile or walk without wearing vulcanite insulation pads in his shoes, and

(3) He can become buried gold, silver and copper.

This strange "electric" man has spent of his 49 years in hospitals puzzling doctors.

A phone test of his divining powers has been held at Plymouth Municipal Museum under the supervision of the curator. The electric man located without trouble buried nuggets of gold, gold-bearing quartz and even gold jewelry.

Stone finds hidden gold and copper by means of a wand consisting of an ordinary steel clock spring. This wand is held in his hand like a make when he approaches a treasure.

The number of wriggles denoted the number of feet he was away from the exact spot. Discussing his unusual gift, Stone said that his divining spells put a great strain upon him and were always followed by periods of intense lassitude.

"The only way I can get relief from the electric currents when I am thus overdone," he said, "is to lie down."

"I enjoy listening to the wireless by loud speaker, but as soon as I put on a pair of headphones I feel physical distress as if I had received a blow on the head. I cannot use a telephone without intolerable pain."

"I once wore my wife's wrist watch and it came all pieces. I must be supercharged with electricity."

"Watch therefore, for ye know not what hour your Lord shall come," Matthew xvi. 22.

Think not I dread to see my spirit fly through the dark gates of hell morning.

Death has no terrors when the life is true. 'Tis living ill that makes us fear to die.

—Omar Khayyam.

When the hour of death comes—that comes to high and low alike—that is not what we have done for ourselves, but what we have done for others that we think on most pleasantly.

—Sir Walter Scott.

When a man dies, they who survive him ask what property he has left behind. The angels, however, on the dying man ask what good deeds he has sent before him.

—The Koran.

Play the Editor

A Difficult Matter To Be Popular

It is likely editors are the most unpopular people in the world. If they try to please one group, they offend another. If they express honest convictions, which they usually do—narrow critics to the contrary notwithstanding—they are by many misjudged and discredited.

If perchance, at rare intervals, an editor hears of no error that has crept in or feels no assault on his idea of what should or should not be published, he is profoundly relieved—almost happy. He does not need commendation for any meritorious thing he has written or done to make him measurably satisfied with life.

Al he needs is freedom from the shackles of those who are looking for imperfections or grounds for disagreement. There is no closed season, and often he is lambasted without knowing it but if he doesn't know it, he is not hurt, and he may even imagine he has escaped by unanimous consent.

We would counsel the young who contemplate journalistic careers to develop thick and tough hides as a preliminary step, and leave behind all desire to run for office, or to win in any other form of popularity contest.—Benson, Minn., Monitor.

The Professor—After your motion for a new trial has been denied that is the next step to take?

The Pretty Girl Student—'I'd cry a little.

You can take lessons by mail to increase your will power or you can practice getting up at night for another blanket.

W. N. U. 1904

## Dyeing this way makes faded Dresses NEW

DIAMOND DYES are the finest that can be used. They are made to give you real service. They contain the very highest quality dyes that can be produced. The quality of the dyes in Diamond Dyes that give such soft, bright, new-looking colors that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliancy through wear and washings. Next time you have dying to do, try Diamond Dyes. See how easy and simple it is to use them. Then compare results. You will surely agree Diamond Dyes are better dyes. The whole package of Diamond Dyes

is the highest quality dye, prepared for general use. It will dye or restore any color. The dye package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this! The dye package dyes silk or wool only. The whole package will dye every kind of goods, including silk and wool. Your dealer has all packages.

## Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on your way. You can have lunch in New York."

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by H. P. Quenter, Berlin, a 21-year-old engineer. Part claims that his "plane" would make the trip from Berlin to New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

"Table script can be converted into many useful things," advises a writer. For instance, the acronym in tests, the little woman can convert it into a spring hat.

## Bulwark Of Civilization

Sir Robert Borden Says British Commonwealth Of Nations Is a Model

The British Commonwealth of Nations stands today as a model to the League of Nations. To destroy its unity would be a crime against mankind. So stated Hon. Sir Robert Borden, Canada's war-time prime minister, at a luncheon of the Canadian Club at Ottawa. Sir Robert was speaking on the occasion of the entertainment of the Canadian Club of the National Federation of Canadian University Students and other delegates to the second international conference of students in session at Montreal. He chose for his subject, "A Vista in Political Evolution."

# NO PLEBISCITE FOR ONTARIO SAYS FERGUSON

Toronto.—Launching the first canards of his political campaign, Premier G. Howard Ferguson announced before a monster gathering here that there would be no plebiscite under his administration on the Ontario liquor control act.

"There will be no plebiscite so long as the Conservative party is in power," Premier Ferguson exclaimed, "and I happen to be the head of the government. We are quite prepared always to submit our record to the public to have it criticized and discussed, and we must be prepared to accept our responsibility."

He went on: "The government does not say the liquor act is perfect. Time and experience are going to demonstrate its weakness." To Ontario liquor control, act was admitted to be probably the best in the Dominion. It was administered by a very capable board.

"Let us try and find any defects in the act as we go along so that any evils which exist may be eliminated," Premier Ferguson declared.

"I am opposed in principle to plebiscites," the premier stated. "They are contrary in principle to responsible government. A plebiscite is a refuge behind which a government may hide from responsibility."

Premier Ferguson had similar references for W. E. N. Sinclair, Liberal leader, on the liquor question.

"I see," the Ontario premier declared, "Mr. Sinclair is a bit wobbly in his effort to follow the path of prohibition. I am not quite sure where he is or where he will land in that respect. It appears to me the position he has taken is that the people have approved of the legislation; but Mr. Sinclair does not want the Ferguson Government to administer it. He now says the Ferguson Government will not administer it and to let those administer it who do not believe in it."

## For Compulsory Pool

Aaron Sapro in Favor Of Marketing System Without Limitation

Estevan, Sask.—"I am for co-operative marketing without reservation and without limitation, but above all I am for control of the commodity that the farmers raise by the absolute elimination of even part of that control by those who have a financial interest in breaking down your great pools. I am for co-operation as a means to an end, that your own wealth by the farmers who end being the absolute control of raise it in whatever technical method they think is the best method of control."

More 700 farmers of the districts tributary to the town of Estevan, Aaron Sapro, America's most famous co-operative farmer, gave expression to these sentiments when, under the auspices of the local lodge of the Saskatchewan section of the United Farmers of Canada, he opened the first gun in the campaign now being started in favor of a settlement of one hundred per cent. pool.

Without equivocation of any kind, Mr. Sapro announced himself as being wholly in favor of one hundred per cent. pool by way of legislation, and in the course of an hour's address gave reasons why such legislation is necessary.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Isabel were house-guests tonight. Their Majesties will probably return back to London tomorrow.

Mr. MacDonald also had a long interview with the King this afternoon while Miss Isabel was talking with Queen Mary.

## Police Return Young Doughboys To Home

Children Made Escape From Institution At Vancouver

Vancouver.—Eight Doughboy children, seven girls and a boy ranging in age from eight to 16 years, escaped from the children's aid home here, and set out to join their parents at Oakalla, Jap. In response to an alarm from the mother of the youngest, police located the youngsters and returned them to the home.

The children were brought here at the same time that more than 100 members of the Sons of Freedom, a sect of Doughboys, were brought to jail here to serve six months sentences for taking part in a nude parade at South Slocan, B.C.

## Entertained By Royalty

Premier MacDonald and Daughter Isabel Guests At Sandringham Castle

Sandringham, Eng.—King George and Queen Mary, accompanied by the Prince of Wales, entertained the premier and his daughter Isabel at Sandringham Castle tonight and talked about whatever it was that a monarch and premier discuss when the latter is on the eve of a historic journey to the United States.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Isabel were house-guests tonight. Their Majesties will probably return back to London tomorrow.

Mr. MacDonald also had a long interview with the King this afternoon while Miss Isabel was talking with Queen Mary.

## THOMAS PLEASED WITH HIS RECENT VISIT TO CANADA

Liverpool, Eng.—"I am completely satisfied with the results of my visit," declared Right Hon. J. H. Thomas, Liberal Unionist Minister of Employment, on his return from a visit to Canada. "I hope and I feel that it will contribute towards a solution of the unemployment problem of this country this winter."

"I promise to meet representatives of all business interests which can do business with Canada, so the necessary steps can be taken to give practical effect to my efforts. Canada will take good and steady from Great Britain which she at present takes from other areas."

"I have not asked Canada to take from us things she produces herself, but I did ask something on account of Britain being the largest buyers of wheat from the Dominion," Mr. Thomas went on. "Canada," he declared, "admitted the force of what he has observed."

"Although, as I say, I shall meet the business organizations of the old country, I say once again, as I did Canada, that the only way to get rid of the unemployment problem is to produce artificially. What we want are customers, and we can have them, have done his best to secure," Mr. Thomas added.

## PROMINENT FINANCIER

Sir Robert Boshby, prominent financier of London, England, who is making a tour of the Dominion with Alfred Shepherd, another British financier, with a view to looking over the various industrial and financial institutions here.

## Guiding 'Planes By Remote Radio Control

Aero Club Given Glimpse Into Future of Air Transportation

Philadelphia.—An aeroplane speed of 16 miles an hour and 'planes navigated without a pilot aboard through the medium of remote control by radio were glimpses into the future given to members of the Aero Club of Pennsylvania, and the Rotary Club, by speakers at a meeting here. It was G. E. Towce, chief engineer of the Aeronautical Laboratories at the navy yard, who is a technical address discussed speed possibilities. A speed of 116 miles an hour is the maximum which can be delivered by any known present day machine, he said, "although Britain may have an engine up her sleeve" larger than any yet constructed.

Edward P. Howard, chief of the air regulations division of the United States Department of Commerce, declared that an application has recently been made for the licensing of a pilotless machine to be navigated by radio impulses.

## Marler Presents Credentials

New Canadian Minister To Japan Received By Emperor

Tokio.—Hon. H. M. Marler, new Canadian minister to Japan, presented his credentials to the Emperor Hirohito. Mr. Marler rode in an automobile to the Imperial household from his hotel to the palace. The ceremony was brief. The foreign minister and minister of the household were present. Japanese Minister Fukuoka was also given formal audience by the Emperor, prior to his sailing for Canada on the "Empress of France."

## Prince Purchases Plane

London, Eng.—The Prince of Wales has bought a two-seated De Havilland Gipsy Moth aeroplane, paying \$2,500 for it. It is for his private use and is equipped with a motor which he can take control himself during flights.

## British Premier May Call Power Conference

Report Says Invitations Likely To Be Issued Shortly

Washington.—Invitations to the five-power naval conference proposed to be held late in January will be issued by Premier Ramsay MacDonald in the near future, but the exact date will not be determined until the conference has been determined.

This was learned here from a reliable source, and with it came the further information that there would be no joint invitations to the half of Great Britain and the United States as has been suggested in some quarters. Secretary of State Henry L. Stimson, said published dispatches emanating from London, that Premier Ramsay MacDonald already had sent invitations through the British embassies at Tokio, Paris and Rome, were without authorization and entirely inaccurate.

The invitations from the British government will go to the United States, Japan, France and Italy, with all five expected to participate in the conference which it is now proposed shall be held in the British capital.

Considerable preparatory work must be done before the invitations are sent forward through the British capital. It may be that the question would be deferred until after the Premier MacDonald has held his conference with President Hoover in Washington early in October. The points still in controversy between the United States and Great Britain on the cruiser question.

## Making Trip To West

Premier King To Make Short Visit In October

Ottawa.—Premier Mackenzie King proposed to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

Arrangements for the trip have been somewhat held up owing to lack of information as to just when Premier Ramsay MacDonald will be in the capital about the fifteenth of October, and Mr. King's trip will begin after the departure of the British prime minister.

## Damage To Chinese Property Enormous

Government Estimates Cost Of Ruined Rail At \$25,000,000

Shanghai.—The Chinese Nationalist Government estimated damage to Chinese property from Russian raiders of Manchurian border points at \$25,000,000, according to a Kwansan semi-official agency despatch.

For three months the 2,000-mile Russian-Chinese border between Manchuria and Siberia has been the scene of sporadic fighting, the trouble starting over Chinese seizure of the Eastern Railway and the Russian administration from the authority of the U.S.S.R.

## SHOULD HOLD EXPORT GRAIN FOR BETTER PRICE

Ottawa.—Nothing should induce the Canadian farmer to move his grain overseas unless he receives a proper price. This is the position taken by H. H. Ramsay, chairman of the Board of Grain Commissioners. "There are sufficient storage facilities in Canada," Mr. Ramsay said in an interview here, "to take care of this year's crop as well as the large hold-over from last year. If there should be any contention it will likely be only temporary."

The welfare of all Canada depends on the farmer receiving a proper price for his grain," Mr. Ramsay said. "There has been some reluctance to pay the price demanded, but this should not deter the farmer in his desire to obtain an equitable return for his crop."

There was every indication that although this year's crop will be large, it would be one of the best on record from a grading standpoint. "The bulk of the crop is grading No. 1 and No. 2," Mr. Ramsay continued. "There is a little of the lower grades that the chief inspector has estimated at No. 4, 5 and 6, and it may be made up composite samples for grading purposes."

The chief commissioner emphasized the importance of the flow of wheat out of Canada. "If all the crop is moved within a few days it means the rushing of a large number of freight cars to western points of origin, as a consequence," he pointed out. "If railway companies have to provide for a sudden demand and cars are idle at other times of the year, it is sure to be a higher carriage rate."

Stabilization of grain prices from year to year is essential to the welfare of the Canadian farmer, but to Canada as a whole, he declared. The western farmer has been somewhat of an eastern manufacturer, and the eastern farmer has been somewhat of a western trader. "The western farmer has been somewhat of an eastern manufacturer, and the eastern farmer has been somewhat of a western trader."

The Hudson Bay route will be as important from the standpoint of commerce as from export. Mr. Ramsay declared later, in an interview. Possibly the new route would have to compete in prices and transportation rates on imports for the western farmer. British manufacturers would be in a better position to compete in prices and transportation rates on imports for the western farmer. British manufacturers would be in a better position to compete in prices and transportation rates on imports for the western farmer.

## Wireless Service Soon

London, Eng.—Beam wireless service direct from England to Australia will be available to the public in the course of a few weeks. This is a new service on which the British post office has been engaged for many months and experimental tests have reached the final stage. Individual messages already have been successfully transmitted in a prolonged series of trials.

## Employment On Increase

Ottawa.—Employment in Canada at the beginning of August showed a further marked increase. This is shown by statements tabulated by the Dominion Bureau of Statistics from 1,840 firms whose returns aggregated 1,097,812 persons as compared with 1,070,871 persons on July 1st. The record is unusually good for this time of the year and the latter number at 127 is a record for all time.

## Income Tax Collections

Ottawa.—Income tax collections are mounting. In the five months ending August 31, collections totaled \$60,392,142, an increase of \$9,311,918 over the same period in 1928. In August alone, according to the National Revenue Department's figures, collections were \$860,427, as against \$622,190 in August of last year.

## Will Represent Japan

Tokyo.—Japan's first step in the new movement for naval disarmament was announced recently, when the navy ministry ordered Commander Tamao Yamada, vice admiral, general staff, to proceed to Washington, to join the Japanese embassy staff there, preparatory to the proposed conference for naval limitation.

## Earthquake, Recorded

Saskatoon, Sask.—The seismograph at the University of Saskatchewan, here, recorded a severe earthquake shock Sept. 17th. It was the most severe registered here in many months. The location of the earthquake could not be determined until compared with records from other points.

## Army and Navy Veterans

Quebec.—The annual convention of the Army and Navy Veterans Association opened here with more than one hundred delegates from various parts of Canada in attendance. Trip-Chief Hon. W. G. Green, of Edmonton, Alta., presided.

## H.B. Line Now Ready

But Regular Trains Will Not Be In Operation Until Next Spring

The Pas, Man.—The Hudson Bay Railway is now in shape to allow regular trains to be run to Churchill with the safety. It was learned here in official railway quarters.

The final two miles of ballasting of the "First Light" were completed this week, placing the road in condition for regular train service. However, passenger trains will not be run to the Bay until the spring, according to a recent despatch in Ottawa. Railway quarters deny the report published in the local press that the muskox train had completed its trial run to Churchill. The train completed its run at Mile 412 as usual. When the train left here recently, it included the private cars of Major J. G. Macdonald, district engineer, and D. R. Campbell, general superintendent of construction, western region. Two other officials were taken from Mile 412 to the Bay on a work train. The two officials made an inspection of the Pin Fish and reported everything in order.

## Imperial Trade Conference

Movement Under Way To Formulate An Empire Trade Policy

London, Eng.—It is understood that attempts are being made to organize an imperial commercial conference to be held prior to the meeting of premiers of the British Empire at the Imperial Conference in 1930.

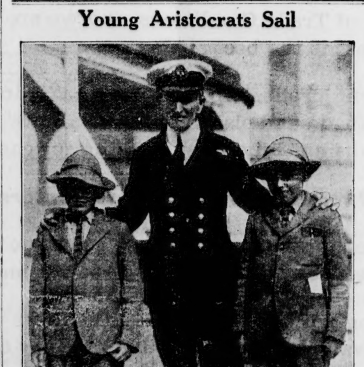

It is proposed that each Dominion shall appoint a small delegation representative of the various interests, agriculture as well as business. The delegation will meet in London three months before the premiers and endeavor to hammer out an Empire trade policy which if agreed the delegation will be submitted to the premiers as a guide in their deliberations.

## Canada Will Sign

Ottawa.—Canada will certainly sign the optional clause in the statute of the world court of international justice. Premier Mackenzie King says. Mr. King was asked in regard to discussions which are going on at present in Geneva with respect to the signing of the clause by members of the British Empire.

## Leads Opera In Germany

Berlin.—Albert Coates, noted conductor, led Boris Godunov, at the State Opera, as the first Englishman to conduct the ballet at the Berlin Opera since Sullivan conducted the Mikado many years ago. Mr. Coates was warmly received by the German audience.

Standing on each side of Captain J. N. Griffiths, skipper of Canadian Pacific steamship "Montclare," the Hon. John and the Hon. George Rodney, aged 9 and 10 respectively, had made the 2,000-mile trip from their father's ranch at Fort Saskatchewan, Alberta, unaccompanied across Canada under the care of Canadian Pacific Railway officials. They are on their way to school in England. The elder is eventually destined for Eton, and the younger will enter the navy via training ship at Dartmouth. Their father is the descendant of a famous British Admiral who won the great sea fight at Cape St. Vincent in 1780.

## FOR CONTROL AND LIMITATION OF THE DRUG EVIL

Geneva.—The British delegation at the League of Nations assembly has presented a proposal designed to bring out an international agreement for control and limitation of production of heroin, morphine and cocaine. The move was regarded as representing a complete reversal by the Labor Government of the attitude in refusing to enter an agreement to limit manufacture of narcotics.

The new British position was announced to the assembly's committee on social questions by N. Baker, member of parliament. The British recommendation is that the League Council invite the governments of countries in which narcotics are manufactured to confer together with a view to the possibility of reaching an agreement on the total amount of each of the various forms to be manufactured annually and as to the quotas of each that these countries should manufacture. The new attitude adopted by Great Britain brings Canada into the international attitude of Canada, the United States and Italy. By the British resolution initiative in bringing a conference of the nations is placed in the League's hands.

## Mongolians Mobilize

Tokyo.—Japanese press agency reports state that the outer Mongolians have mobilized all men between the ages of 20 and 40, and has ordered two cavalry divisions commanded by So-toku to enter an agreement to limit manufacture of narcotics.

## To Confer With Hon. Forke

Ottawa.—Hon. George Hodley, Minister of Agriculture from Alberta, is in the capital for a conference with Hon. Robert Forke, Dominion Minister of Immigration. While the subject up for discussion was not officially made known, it is understood that the state of the employment situation in Alberta are to be discussed.

## More than 1,000 American citizens are living in South Africa.

### LOCAL AND GENERAL

The completion of the stucco on Louis Fath's residence has improved the appearance vastly and it is now a credit to the section of the town where it is located.

After several, attempts to let the dining room of the Savoy hotel which were very unsatisfactory, the hotel company has undertaken to operate the room. Meals are served at regular hours, the old cafe system of being open almost night and day having been abandoned. The new management is meeting with gratifying success.

The completion of the community hall marks quite an epoch in the history of Champion. Now that we have the hall the mystery is how we ever got along without it. In addition to its convenience its beauty is an asset to the town not easily overlooked.

With wheat worth some twenty cents per bushel more in Canada than in the United States people in the big republic must be wondering just what use a tariff of 45 cents per bushel against Canadian wheat may be, especially to the farmers.

It has been a matter of remark that a prominent citizen was looking extremely well fed recently. The solution to the situation is "angel food."

There is music everywhere these days. There are many agents for radio sets and each one is doing his best to furnish more and better music than his competitor. The result is that you have to go to a back street if you want to talk with any certainty of being heard.

### Won Handsome Prize

(From Melford Times, Oregon)

Little Durell Adams called at this office to-day and reported himself as the proud owner of the beautiful automobile presented by Wm. Bolger of the J. C. Penny Co., as first prize for the best decorated scooter in the parade last Tuesday. He is thankful, also, for the many compliments received. He was too much exhausted to remain at the playgrounds during the entire program, being unaccustomed to the warmth and weight of the fur, beads and jewelry with which he was adorned during his afternoon's sojourn in the savage state. Durell says he may decide to permanently adopt this custom when he becomes one of the occupants of the new Moorish type apartment house, which his daddy (L. J. Adams) is constructing on North Holly street, opposite the Spanish court which bears his name.

### Planting Tulips

The correct time to plant tulips is when the bulbs are ripe, the ground in condition, and the bulbs to hand, which, on the prairies may be any time between August and freeze-up. However, as in garden practice the position reserved for tulips is usually occupied by summer-flowering plants, the operation has to be deferred until these are frozen or out of bloom, which, in general, is in October. At this time some well decayed manure should be dug in to supply the food requirements of the bulbs and the succeeding summer crop of flowers.

The garden tulip has many forms or groups, each of which has characteristics requiring consideration when

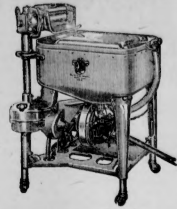

planting, but, for the purpose of this article a brief reference to the three most popular, namely, the Early Single, Early Double and the Darwin must suffice. It must be asserted that the tulip is most effective when in masses of distinct colors so that flower beds and small borders should be planted with one, or at the most two, contrasted or blended colors.

At the Morden Experimental Station the Early Singles are planted in a sheltered border in patches varied in shape and of a size to fit the number of bulbs of each variety, each patch being distinct in outline and fitting into the whole. After the ground is marked out in the desired form the bulbs are placed in position four inches apart on the margin of the patch, afterwards filling in the centre at the same distance in rows nine inches apart. All the bulbs being laid out, planting begins by the operator starting at one end of the border facing the bulbs and with a trowel, burying each four inches below the position it occupied on the surface.

The Early Double Tulip can be treated in a similar manner, but its blooming period on the prairies is later and apt to synchronize with the planting out season, and for this reason is better planted alone. Blooming from the first to the third week in June, the Darwins are perhaps the most desirable of all, the tall stems and rich pastel shades of color making them great favorites for room decoration and on this account they, too, are better planted in some part of the garden where the effect will not be marred by the gradual deflection of the best flowers, as the temptation to cut them is always irresistible. Strong growing plants with stems sometimes two and a half feet high require planting six inches apart in rows fifteen inches distant from each other. They are also very effective when planted in small groups in the perennial border.

When the ground is slightly frozen in the fall, a six-inch covering of straw or stable litter will be a protection from the vagaries of winter and early spring—Wm. Godfrey, Dominion Experimental Station, Morden, Man.

## Another Maytag Triumph

### 24 Out of Every 39 Women Bought a MAYTAG WASHER

There is no substitute for Quality. People today demand quality, efficiency and service. Price does not count when buying articles of this kind.

The few dollars difference fades out of the picture when you place the machines side by side and see the real difference.

Maytag's new and better motor.  
Maytag's cast aluminum tub.  
Maytag's tub design to give you a dirt zone and water action.  
Maytag's superior built wringer.

Prove without an argument the advantages of Maytag Washers. We welcome any comparison you make. We are willing to place a Maytag Washer against any washer on the market. Take it out on a free trial. If you are not convinced its worth the money, return it.

# == ANNOUNCEMENT ==

## CHANGE OF POLICY

On October 1st we place our business on a Cash Basis. We have made this decision after a year of careful study of Trade Conditions, and we are fully convinced that the Cash method of doing business is the best.

The Old Time, long credit, long profit, expensive and hazardous way of doing business has given way in Eastern Canada and elsewhere to the new and more up-to-date and efficient method of merchandising--buying and selling for cash at small profits.

**We are making substantial reductions in prices to conform with our New Policy.**

Our regular service will be maintained, and we are convinced that when you study our new method of doing business, you will become one of our many customers.

We take pleasure in thanking you for the generous support you have given us under the old system and look forward to meeting you under new conditions which will prove more profitable to both parties.

Sincerely Yours,

## The Joplings.
